GRC Recycling Portal — The Director's Plan

Oct 12, 2026 · @Mazen

0 · Read this first

The GRC Recycling Portal is built and working (v2). This document is its director's script: every screen, colour, movement and feeling, written so Claude Code can take it to production and polish it without guessing.

It is three things at once. For the director (Mazen), it records what was decided. For Hugo and the admin team, it explains how the portal runs week to week. For Claude Code, it is the brief: read it fully before touching a file.

In one paragraph. A student lands on a dark-forest landing page where the GRC tree badge glows on a sand-gold disc and the slogan *"planting seeds, growing change"* sits under the name. They scroll through a short film about who Greenroots is, how the recycling initiative works and what it has already achieved. They sign up with their school, unlock the portal with a code, and take a **private group survey**. Admins turn those answers into fair groups with one click. From then on the portal is each student's home for the initiative: their group, their sessions, their attendance and CAS hours, their reflections, their badges. Admins get a control room to run all of it.

How each section is written

Every screen in sections 4 to 9 uses the same blocks, in this order.

Block	What it means
STATUS	What is already built in v2, and what is still to build
THE FEELING	How the person must feel here. Every visual decision serves this
THE SET	The still photograph: background, colours, light, texture, before anything moves
THE FILM	A shot list: the time or scroll position, the shot, and exactly what the person sees
INTERACTION	What happens on hover, tap and click

Block	What it means
IDLE LIFE	What keeps moving gently when nobody touches anything
DO NOT	Forbidden. Any one of these means the screen is not done
DONE WHEN	Every box must be true before the screen is called finished

Non-negotiables

- **The survey must work and its results must reach the admins.** It is the heart of the grouping. Section 8 covers it end to end.
- **Privacy is enforced by the database, not the page.** Students never see each other's ratings, emails or phone numbers.
- **Brand comes from the Proposal & Dossier v2.2.** Forest green, sand gold, the tree mark, Cinzel for the wordmark. Nothing off-palette.
- **Do not interpret a script into something easier.** If something is impossible, say so, propose the closest equivalent and wait. If you improve something, say in one line what changed and why.

1 · The feeling

Walking into a greenhouse at golden hour. Outside is noise and grey corridors. Step through the door and the air is green, warm and quiet, light comes through leaves in soft gold, and everything has its place. That is the whole portal: calm, alive, organised, and clearly cared for by people who mean it.

Greenroots' own words set the tone: *respect for life*, *not greenwashing*, *real action you can see*. So the site must never feel like a corporate eco template with stock smiles and cartoon recycling arrows. It should feel like a student organisation that is more professional than anyone expected.

The student's emotional journey

Moment	They should feel	How the design delivers it
First second on the landing page	"Whoa, this is serious."	Dark forest photo, the glowing sand badge, GREENROOTS in carved Cinzel capitals
Scrolling the story	Curiosity, then trust	Each section rises into view; real numbers count up; real names on the team
Creating an account	Calm and safe	A quiet, formal split screen; one clear step at a time; privacy promised in plain words
Entering the code	A small "unlock" thrill	A big monospaced code field, then a toast: "You're in! Welcome to the initiative"
Taking the survey	Heard, and protected	A dark-green privacy banner first, then friendly 1 to 5 buttons with plain labels
Seeing their group	Belonging	A big sand-gold "Group 2", their teammates' faces as initials, a league to climb
After each session	Proud	The attendance ring fills, hours add up, a badge lights from dashed grey to gold
End of year	"I have proof."	A certificate-style CAS summary, signed by the Executive Director

The admin's feeling

Mission control in a greenhouse. Everything that needs attention is already listed when they open the overview. One click builds groups, one click marks a whole group present, one click copies a WhatsApp reminder. The admin should never wonder "who hasn't done it yet?" The portal tells them.

Three words to test every screen

1. **Alive.** Something always moves gently: leaves, a counter, a dashed ring turning. Never a frozen page.
2. **Rooted.** Forest green and sand gold everywhere. It must feel like Greenroots, not a template.
3. **Clear.** A 13-year-old in 1 ESO understands every screen without help.

2 · Brand system (applies everywhere, always)

Two colours carry the whole brand: deep forest green and warm sand gold, exactly as in the Proposal & Dossier v2.2. Every other colour is either a shade of those two or has a single job.

2.1 Palette

Name	Value	Role
Forest 950	#081A08	The darkest ground: the footer, the deepest hero shadow. Never pure black
Forest 900	#0D260D	Side menu, dark sections, the landing "initiative" film
Forest 800	#143613	The signature green: primary buttons, date tiles, the top of every group card
Forest 700	#1F4018	Hover state of primary buttons, gradient partner
Forest 600	#2E521F	Rings, bars, focus borders
Moss	#5D7A3A	Eyebrow labels on light backgrounds, quiet icons, the italic accent in headlines
Leaf	#8CC63F	Keyboard focus outline only

Name	Value	Role
Sand	#EBCB8A	The signature gold: the logo disc, "Join now", the active menu item, badges
Sand 400	#E2BD72	Gold gradients, the first place in the league
Sand 300 / 200 / 100	#F0D9A8 / #F5E7C8 / #F8F0DE	Soft panels, chips, light sections
Cream	#F3EAD4	The portal's page background. Never plain white
Paper	#FFFAF0	Cards on cream
Ink	#17240F	Main text. Ink 2 #3C4A33 for body, Muted #6B7760 for captions
Clay	#B4532F	Errors, "absent", overdue, delete buttons
Amber	#C98A1F	"Excused", "due soon"
Status present / late	#3F7A2A / #8AA53A	Attendance only
Rating scale 1 to 5	#D9805F, #ECC29A, #E8E1CC, #A9C97E, #4F8A35	The survey buttons and the admin rating grid only
SDG 13 / SDG 4	#3F7E44 / #C5192D	The official UN colours, only on the SDG cards and footer chips
Madrid bins	Yellow #F2C230, Blue #2A6FB5, Green #3C8A3E, Brown #8A5A35, Grey #6F736F	Only on the bin cards, matching the real street containers

2.2 Typography

Use	Font	Treatment
The wordmark GREENROOTS, eyebrows, certificate names	**Cinzel** 600 to 700	Capitals, letter-spacing 0.04 to 0.22 em. Carved, classical, like the Proposal cover

Use	Font	Treatment
· C O L L E C T I V E ·	Montserrat	Very wide tracking (0.42 to 0.6 em), sand 300
Headlines and numbers	**Bricolage Grotesque** 700 to 800	Tight tracking (-0.03 em), heavy, friendly. One word or phrase in sand or moss for accent
The slogan	Bricolage Grotesque *italic* 400	Always in curly quotes: “planting seeds, growing change”
Body, buttons, forms	**Montserrat** 400 to 700	15 px base, 1.55 line height
Codes, GRC IDs	System monospace	Wide tracking, uppercase

Type scale: hero name up to 104 px, section titles 32 to 54 px, page titles 28 to 40 px, card titles 17 px, body 15 px, captions 12.5 px. Nothing readable below 11 px.

2.3 The logo

- **The tree mark** is taken from the Proposal cover, cut out cleanly with a transparent background in two versions: forest green (for sand backgrounds) and sand (for green backgrounds).
- **The badge**: the green tree on a sand disc, with a soft sand halo and, on large sizes, a dashed sand ring orbiting slowly around it (one turn every 40 s). This is the GRC seal. It appears on the hero, the sign-in panel, the join screen, the CTA and the certificate.
- **The lockup**: tree + GREENROOTS (Cinzel) + COLLECTIVE (tracked Montserrat). In the portal menu the second line becomes the slogan in italic.
- Never recolour the tree, stretch it, put it on a busy photo without the disc, or redraw it.

2.4 Imagery

One photograph carries the brand: the overhead garden table from the Proposal cover (pots, basil, ferns, trowels on dark soil). It is always under a green gradient (72 to 98% forest), so it reads as texture and depth, never as a stock photo. It appears in the hero, the sign-in panel, the student home banner and the final CTA. No other stock imagery. No cartoon recycling arrows, no clip-art globes.

2.5 Icons

One family only: **Lucide-style line icons**, 1.8 stroke, rounded caps, drawn inline. Every menu item has one (house, checklist, calendar, calendar-check, people, megaphone, open book, user, **gear for Settings**, log-out). Icons sit inside rounded squares (12 px radius): sand tile with green icon on light, green tile with sand icon on dark.

2.6 Shape and depth

- Corners: cards 20 px, small cards 12 to 16 px, buttons and chips fully round (pills), banners 26 px.
- Shadows: soft and green-tinted, never grey: `0 12px 32px -14px rgba(20,54,19,.22)`. One shadow level for cards, one deeper for floating things (modals, the hero stat cards).
- Glass only on the landing hero cards and the sticky nav: 14 px blur, 8% paper fill, a thin sand border.

2.7 Motion vocabulary

Word	Meaning
rise	The default entrance: 18 px up and 0 to 100% opacity over 700 ms, ease `cubic-bezier(.2,.7,.2,1)`. Built
stagger	Items in a row rise one after another, 60 to 80 ms apart. Built on steps, bins and team cards
count-up	Numbers roll from 0 to their value over 1.3 s, ease-out cubic, when they enter the screen. Built
float	Slow vertical drift of 12 px over 7 s, forever, phases offset. Built on the hero glass cards
orbit	The dashed ring around the badge turns once every 40 s. Built
lift	On hover, cards rise 4 to 6 px and their shadow deepens, 250 ms. Built

Word	Meaning
sweep (to build)	A soft diagonal band of warm light glides once across the badge or a gold surface, 20 to 30% white, 900 ms
leaf drift (to build)	6 to 10 small blurred leaf silhouettes drift slowly down the hero and CTA at 4 to 8% opacity, never over text

Everything respects “reduce motion”: with it on, all entrances are instant and nothing loops.

2.8 Voice

Short, warm, direct, a little proud. "Small groups. Real impact." "Ready to dig in?" "You're in!" Never corporate ("leverage", "synergy"), never preachy. British spelling (organisation, colour), matching the Dossier.

3 · The public mini-site (the landing page)

STATUS: built in v2 with all ten scenes below. To build: the light sweep, leaf drift and the hero mask reveal (marked *to build*). Sections alternate dark / sand / dark / cream so no two neighbours match.

THE FEELING. A short nature documentary about a student movement. Dark and cinematic at the top, opening into warm sand light as you learn more, ending back in the forest with an invitation. A visitor should reach the bottom thinking "I want to be part of this."

Scene order

#	Scene	Ground	Purpose
0	Sticky menu bar	Transparent, then dark glass	Navigate; Sign in and Join always one tap away
1	Hero	Forest photo under green	The seal, the name, the slogan, the promise
2	Marquee ribbon	Sand	Rhythm and values in one moving line

#	Scene	Ground	Purpose
3	Who we are	Sand 100	Founding story, mission, vision, values
4	The initiative	Forest 900	How it works in 5 steps + 4 perks
5	Impact	Cream	Live recycling counters + GRC's history numbers
6	Know your bins	Sand 100	The six Madrid bins, colourful and useful
7	The people behind it	Cream	Management team + SDG 13 and 4
8	FAQ	Sand 100	Six real questions answered
9	Final call	Forest photo	"Ready to dig in?"
10	Footer	Forest 950	Shortcuts, contact, legal

Scene 0 · The menu bar

THE SET. 72 px tall, full width, content held to 1180 px. Left: the sand tree + GREENROOTS / COLLECTIVE. Centre-right: About · The initiative · Impact · Team · FAQ in sand-white Montserrat 600. Right: "Sign in" (outlined sand pill) and "Join now" (solid sand pill).

THE FILM. At the top it is fully transparent over the hero. After 40 px of scroll it turns into dark forest glass (86% Forest 900, 14 px blur, a hairline sand border at the bottom) over 300 ms.

INTERACTION. Links get a faint sand pill behind them on hover. A link glides the page smoothly to its scene, stopping 64 px below the bar. On phones the links collapse into a burger; tapping it slides a forest panel in from the right with large Bricolage links and both buttons.

Scene 1 · The hero

THE SET. Full screen. The garden-table photo under a vertical gradient from 72% to 98% forest, plus a soft green glow to the right where the stat cards float. Left column (60%): the seal (128 px), then GREENROOTS in Cinzel 104 px sand, then · COLLECTIVE · tracked wide, then the slogan in italic white, a short sand rule, the eyebrow "RECYCLING INITIATIVE · 2026–27", the headline "Small groups. *Real impact.*" (second half in sand), one

paragraph, and two buttons: "Join the initiative →" (sand) and "How it works" (outlined). Right column: three glass cards, each with a sand icon tile and a live number: kg recycled this year, students taking part, sessions completed.

THE FILM (on load, about 2.2 s).

Time	Shot	What the visitor sees
0.0–0.4 s	Dawn	The photo fades up from deep forest, as if light is reaching the table
0.2–0.9 s	The seal	The sand disc rises and settles; its dashed ring begins to orbit
0.5–1.2 s	The name	GREENROOTS rises from a mask, letter by letter, 40 ms apart (*to build*: today it rises as one line)
0.9–1.4 s	The promise	Slogan, rule, eyebrow, headline and paragraph rise in a stagger
1.2–1.8 s	The proof	The three glass cards drift in from the right and the numbers count up from 0
1.8–2.2 s	The light (*to build*)	One warm sweep crosses the seal from top-left to bottom-right

IDLE LIFE. The glass cards float up and down 12 px on 7 s loops, out of step. The badge ring orbits. A mouse-shaped scroll cue at the bottom has a sand dot that drops and fades every 1.8 s. *To build:* a few blurred leaf silhouettes drift down at 4 to 8% opacity.

DO NOT. Put text over the busiest part of the photo. Use pure black. Use stock people. Let the cards cover the headline on any width.

Scene 2 · The marquee ribbon

A sand band with a hairline darker edge. In Cinzel capitals, separated by small green leaf icons: SDG 13 · CLIMATE ACTION, SDG 4 · QUALITY EDUCATION, CAS ACTION & SERVICE, RESPECT FOR LIFE, STUDENT-LED SINCE 2024, AGORA MADRID INTERNATIONAL SCHOOL, SMALL GROUPS, REAL IMPACT. It scrolls left forever, one full loop every 38 s, seamless.

Scene 3 · Who we are

THE SET. Two columns on sand 100. Left: the headline "A student-led organisation teaching *respect for the living world.*" (second part in moss), then the founding story: founded in October 2024 by Mazen Choumari at Agora Madrid; a neglected corner of campus became a working garden; now clubs, programmes and recycling. A quieter line: "Not greenwashing, not trends." Right: three paper cards stacked, each with a green icon tile: **Our mission** (target icon), **Our vision** (globe), **Our values** (heart), their text taken from the Dossier.

THE FILM. The text rises first, then the three cards rise 80 ms apart. **INTERACTION.** Each card slides 6 px to the right on hover, as if leaning in.

Scene 4 · The initiative

THE SET. Forest 900 with two soft green glows in opposite corners. Eyebrow "THE RECYCLING INITIATIVE", headline "Structured, never stressful." in white, one paragraph. Then five step cards in a row, joined by a dashed sand line that runs behind their icons: 01 Create your account · 02 Unlock with your code · 03 Take the group survey · 04 Recycle once a month · 05 Reflect & log CAS. Each card: a sand icon tile ringed by the dark background (so the dashed line seems to pass behind it), a small step number top-right, a title and two lines. Under them, four darker perk tiles: About once a month · Calendar sync · Badges & certificate · Session photos.

THE FILM. Steps rise one by one, 80 ms apart, left to right, like footsteps. **INTERACTION.** A step lifts 4 px and brightens on hover.

Scene 5 · Impact

THE SET. Cream. Centred headline "From one student to a school-wide engine." Four solid forest tiles with sand numbers: **kg recycled**, **bags collected**, **sessions done**, **participants**. These are live, read from the database through a safe public summary (no names). Under a small label "🌿 GREENROOTS COLLECTIVE SO FAR", four dashed outline tiles with moss numbers from the Dossier: **600+** interactions, **50+** active club members, **240+** expected sessions, **100%** school reach.

THE FILM. Every number counts up from 0 when it scrolls into view (1.3 s, ease-out). Decimals stay to one place (41.1 kg).

DONE WHEN.

- [ ] Live numbers match the admin overview exactly.

- [ ] Before the first session the tiles still read cleanly: 0 is allowed, labelled "this year", never a broken or blank state.

Scene 6 · Know your bins

Six bin-shaped cards with a darker "lid" strip on top, in the real Madrid colours: **Yellow** (packaging), **Blue** (paper & card), **Green** (glass), **Brown** (organic), **Grey** (general waste), **Punto Limpio** (special waste, in forest). On hover each bin lifts 6 px and tilts 1°, like being nudged. They rise in a 60 ms stagger.

Scene 7 · The people behind it

Four paper cards: a round forest-gradient avatar with Cinzel initials in sand and a sand halo, the name, the role in small moss capitals, and one line. **Mazen Choumari**, Founder & Executive Director · **Hugo Torres**, Technological Infrastructure Manager · **Cristina Cárdenas**, Garden Program Manager · **Sammy Roy**, Activities Program Manager. Below, two wide cards in official UN colours: **13 Climate Action** and **4 Quality Education**, with a huge number on the left. *To build:* real photos replacing initials once supplied.

Scene 8 · FAQ

Left: "Good questions." and the contact email. Right: six accordion cards. The "+" sits in a sand circle; when a question opens, the circle turns forest and the + rotates 45° into an ×. Questions: How often will I go? · Does it count for CAS? · Can I be with my friends? · Who sees my survey answers? · What if I can't make a session? · What do I need to bring?

Scene 9 · Final call

The garden photo again under a darker gradient. The large seal with its orbiting ring, "Ready to dig in?" in white Bricolage 62 px, one line, and two buttons: "Create my account →" (sand) and "I already have one" (outline). *To build:* leaf drift and one light sweep across the seal as the section enters.

Scene 10 · The dark footer

Forest 950. Four columns: the brand (lockup, the slogan in italic sand, one line about GRC, SDG 13 and SDG 4 chips) · **Explore** (the five sections) · **Portal** (Sign in, Create account, Reset password) · **Greenroots** (greenroots.tech with a globe icon, Email us, Madrid, Spain). A hairline, then © 2024–2026 Greenroots Collective. All rights reserved, and a one-line LOPD data note.

Mobile

Everything stacks to one column at 760 px. Hero cards hide below 1100 px. Steps become one per row, counters two per row, bins two per row, footer two columns with the brand on top. Side gutter 16 px; nothing ever scrolls sideways.

DONE WHEN (whole landing page)

- [ ] Every scene enters with motion; nothing just appears.
- [ ] The slogan sits directly under the name in the hero, the sign-in panel and the footer.
- [ ] Live counters are correct and count up once.
- [ ] The menu bar never covers a heading after a menu-link jump.
- [ ] Works at 1440, 1366, 1024, 768 and 390 px wide with no overlaps or clipped words.
- [ ] With "reduce motion" on, the page is complete and still.

4 · Joining: sign in, create account, the code

STATUS: built in v2. Sign in, Create account, Reset password, Choose new password, Enter code and Access paused all share one formal split-screen frame.

THE FEELING. Walking from the garden into the reception of a well-run organisation. Quieter than the landing page, formal, reassuring. One clear task per screen, nothing to distract.

THE SET. Left half: the garden photo under a diagonal forest gradient, "‹ Back to home" top-left in sand, the seal (96 px, orbiting ring), GREENROOTS in Cinzel 58 px, · COLLECTIVE ·, the slogan in white italic, then three promises with sand icons: *Groups built from a private survey · Sessions, attendance & CAS hours in one place · Your data is only visible to the GRC admin team*. Bottom-left in tiny Cinzel: RECYCLING INITIATIVE · 2026–27. Right half: Paper, a single column 420 px wide, vertically centred: a big Bricolage title, a muted subtitle, the form. On phones the left half disappears and a small seal + GREENROOTS sits above the form.

4.1 Create account (step 1 of 2)

Title "Create your account", subtitle "Step 1 of 2. Next you'll enter your initiative code." Fields, in order:

1. **Your school** (required dropdown, "School · City"). When chosen, the email placeholder becomes `name.surname@student.agoraism.com` and a moss hint appears under the email: "Use your @student.agoraism.com address". With only one school, it is pre-selected.
2. **Full name** ("As on your school records").
3. **School email.** Must match the chosen school's student or staff domain, checked on the page and again in the database.
4. **Class** (1 ESO A → 2º Baccalaureate International, or Other).
5. **Password** and **Confirm**, side by side, 8+ characters, must match.
6. **Consent** checkbox: "I agree that Greenroots Collective stores my name, school email and class to run the initiative. Only the GRC admin team can see them."

Button: "Create account" (forest, full width, 52 px). Below: "Already have an account? **Sign in**". With email confirmation on, the form is replaced by a mail icon in a forest circle, "Check your inbox", and a button to Sign in.

What is deliberately not asked here: date of birth, phone, guardian, tutor. They belong to the Mainframe and come later. WhatsApp number is optional, in Profile.

4.2 Enter your code (step 2 of 2)

Title "Welcome, Alex!", subtitle "Step 2 of 2. Enter your initiative code to unlock your portal." One huge monospaced field, 24 px, letters spaced wide, auto-uppercase, placeholder ENTER CODE. Button "Unlock my portal →". Under it: "The code is in the GRC email and the WhatsApp Community." Footer line: "Signed in as … · Sign out".

THE FILM. Wrong code: a clay toast slides up from the bottom, "That code is not valid. Check with the GRC team." Right code: a forest toast with a sand tick, "You're in! Welcome to the initiative 🌱", and the portal opens on Home. The **admin code** typed here opens the admin control room instead.

4.3 Sign in, reset, paused

- **Sign in:** "Welcome back", email, password with a small "Forgot?" link on the label row, "Sign in". In demo mode a dashed divider then "Explore the demo as [a student] [an admin]".
- **Reset password:** email → "If that email has an account, a reset link is on its way." The link opens "Choose a new password".

- **Access paused** (status set to inactive by an admin): a calm message with the contact email and a Sign out button. No blame.

DO NOT. Ask for more than these fields. Show which emails exist ("no account with this email"). Put the code on any public page.

DONE WHEN.

- [ ] A wrong-domain email is refused with a message naming the school and its domain.
- [ ] Mismatched passwords are caught before sending.
- [ ] Signed-in users who haven't entered a code always land on the code screen, whatever link they open.
- [ ] The whole flow works on a 390 px phone with the keyboard open.

5 · The portal frame: side menu and top bar

STATUS: built in v2. The same frame wraps every student and admin page.

THE FEELING. A well-organised greenhouse office: a dark green wall on the left holding everything in order, and a bright, warm workspace on the right.

5.1 The side menu (268 px)

THE SET. Forest 900 with a faint green glow in the top-left corner. From top to bottom:

1. **The lockup:** sand tree, GREENROOTS in Cinzel, and the slogan in small italic under it.
2. **The programme card:** a sand tile with a recycling icon, "Recycling Initiative", and the school name ("Admin · Agora Madrid" for admins). This is where future programmes will switch.
3. **Navigation**, grouped under tiny spaced capitals:
   - Students — RECYCLING: Home, Activities, Calendar, Attendance, My group · COMMUNITY: Announcements, Guide · MORE PROGRAMMES: Garden Club *Soon*, Workshops *Soon* (greyed, not clickable).
   - Admins — CONTROL ROOM: Overview, Members, Activities, Group builder · SESSIONS: Sessions & impact, Attendance · COMMUNITY: Announcements, Schools.
4. **The person card** at the bottom: initials avatar, name, GRC ID in monospace, then a **gear (Settings)** and a **log-out** icon.

INTERACTION. Each item is an icon + label in a 44 px row. Hover: a faint sand tint. Active: a solid sand pill with forest text and a soft gold glow under it. **Red count badges** sit at the right of an item: Activities (things to do), Announcements (new since last visit), Attendance for admins (absence requests waiting). On the active item the badge flips to forest with sand text.

5.2 The top bar

Sticky, 66 px, cream glass (85% cream, 12 px blur, hairline border). Left: the page's icon and name. Right: for admins a "Survey results" chip; a **bell** that shows a small clay dot when anything needs attention; the initials avatar linking to Profile.

5.3 Phones

Below 900 px the side menu leaves the screen. A burger in the top bar slides it in from the left over a dark scrim (300 ms, smooth deceleration); an × or a tap on any link closes it. Page padding drops to 16 px.

5.4 The page body

Cream background, content up to 1240 px wide. Every page starts with a header: a small Cinzel eyebrow in moss, a Bricolage title 28 to 40 px, and one line of explanation. A quiet footer closes every page: © line with the slogan, Guide, Contact.

5.5 Shared pieces

- **Toasts:** a forest pill rising from the bottom centre with a sand tick (or a clay pill with an alert icon), 3.4 s, one at a time.
- **Modals:** a paper card, 22 px radius, over a blurred dark-green scrim; Escape or a tap outside closes them.
- **Pills:** Present (green), Late (olive), Excused (amber), Absent / Overdue (clay), Upcoming / Due (sand), Not marked (grey).
- **Demo banner:** a thin sand strip at the very top in demo mode with "Reset demo". Gone once the live database is connected.

DONE WHEN.

- [ ] The active page is always highlighted in the menu.
- [ ] Badges show real counts and vanish at zero.
- [ ] The menu scrolls on its own if the screen is short; the person card stays at the bottom.

- [ ] Settings is reachable from the gear on every page.

6 · The student portal, page by page

STATUS: all pages built in v2 and tested as a new student and as the demo student. The portal covers **recycling activities only**; future programmes plug into the same frame.

THE FEELING. "This is mine." Every page answers one question fast: what's next, what do I have to do, how am I doing.

6.1 Home

THE SET. At the top, a wide banner (26 px corners): the garden photo behind a forest gradient running left to right. Inside: today's date in small Cinzel sand capitals, a big greeting by time of day ("Good morning, Alex."), one sentence that sums up the moment ("You have **5 activities** to complete and your next session is **in 22 days**"), and three glass chips: *Group 2 · 2/10 badges · 2 streak*. On the right, a 132 px **attendance ring** in sand on a faint sand track, with the % in white.

Below, a six-column grid of cards:

Card	What it shows
Up next	A calendar tile (month band in forest, day number big, weekday small), "In 22 days", time, meeting point, lead admin, and two buttons: **Add to calendar** and **Can't make it**
To do	Up to four activity rows (icon tile, type label, title, due pill, chevron). "All done!" with a green tick when empty
Stat strip	Four figures with icon tiles: sessions attended · CAS hours · kg by your group · reflections
Badges	Ten round medals: earned ones gold with a forest ring, locked ones dashed grey. "Next: …" names the next badge to earn
Group league	Horizontal bars of kg recycled per group; your group's bar in deep forest and labelled "you"
Announcements	The two latest, pinned first with a pin

THE FILM. The banner rises first, the ring sweeps from 0 to its value over 1.2 s, then cards rise in reading order. **IDLE LIFE.** *To build:* the banner photo drifts 1% over 20 s, very slowly, like breathing.

6.2 Activities (the to-do centre)

There is **no survey button in the menu**. Everything a student must do lives here, each with a date.

THE SET. Three summary tiles: **to do** (forest), **overdue** (deep clay), **completed** (moss), each with a big sand number. A two-tab switch, *To do (n)* | *Completed (n)*. Then the list. Each row: a coloured icon tile by type, a tiny capital type label, the title, a status pill, a chevron.

Type	Icon tile	Where it comes from	What "done" means
Survey	Pale green, people icon	Admin activity (the group survey)	Answers sent

Type	Icon tile	Where it comes from	What "done" means
Agreement	Sand, handshake	Admin activity	Read and ticked "I agree"
Link / form	Pale blue, link	Admin activity (WhatsApp Community, Google Form…)	Student taps "Mark as done"
CAS reflection	Pale clay, pen	**Automatic**, one per session the student attended	Reflection saved

Pills: *Due 17 Oct* (sand), *Due tomorrow* / *Due today* (amber), *Overdue* (clay), *Done* (green with a tick), *Closed* (grey). Order: overdue first, then by due date, done last.

Opening an activity shows a large icon tile, the type, the title, the pill and the full due date, then its body:

- **Agreement:** the text (attend on time, give 24 hours' notice, respect the admin chain Operations → Management → Executive Director, don't share GRC files or photos outside), a large "I have read this and I agree" checkbox, and an Accept button that stays disabled until ticked.
- **Link:** the text, an "Open link" button, and "Mark as done".
- **CAS reflection:** the session's date, group and kg, then three fields: *What did you do?* (required), *What did you learn or find challenging?*, and *Which CAS learning outcome fits best?* (the seven IB outcomes, LO1 to LO7). A tip: copy it into ManageBac.
- **Survey:** see section 7.

6.3 Calendar

Left: a month grid (Monday first) inside a paper card with ‹ › arrows. Days with a session are filled: forest for upcoming, green for attended, amber for excused, clay for absent, grey for cancelled. The start time is printed inside. Today has a green outline. A legend underneath. Right: **Upcoming** and **Past** lists of session rows (date tile, weekday + group, time + place, a status pill, a calendar-plus icon and "Can't make it"). Past rows show a camera icon when the album link exists. Header button: **Add all to my calendar** (.ics with a 30-minute reminder).

"Can't make it" modal: the date and time, a clay warning if the session is less than 24 hours away ("Please also message the admin team on WhatsApp right now"), a reason box, and "Send request". The row then shows *Absence pending*, later *approved* or *declined*.

6.4 Attendance tracker

A 150 px forest ring with the attendance rate (excused sessions don't count against you), then six tiles, each with a coloured left edge: Present · Late · Excused · Absent · CAS hours · Current streak (flame). Then **Session history**: date, time, status pill, hours, reflection (*Written* or *Write*), photos link. Then **Absence requests** with their status and a Cancel button while pending. Header button: **CAS summary**.

6.5 My group

Before groups are published: the tree, "Groups are growing…", and a link to Activities. After: a wide forest banner with "Group 2" huge in sand, "4 members · #1 in the league", and four white numbers (kg, bags, sessions, attendance %). Below: **Members** (initials, name, class; you first in a forest circle) and the **League table** (rank circles, first place in gold, your row tinted sand). Then upcoming group sessions.

6.6 Announcements and Guide

Announcements: cards with a sand left edge (forest when pinned), *Pinned* and *New* pills, title, date, text, signature. Opening the page clears the red badge. **Guide:** how a session works in five numbered steps, the responsibilities with green ticks, the six Madrid bins, and a contact card.

6.7 Profile and Settings

Profile: the **GRC ID card**, a sand-gradient card like a membership pass, with the tree, GREENROOTS · RECYCLING, a forest year pill, the student's name big, and four facts (GRC ID in monospace, group, class, school), with a faint giant tree watermark in the corner. Next to it: name, class, WhatsApp country code and number ("only admins can see it"). Below: all ten badges as cards. A button: **Download CAS summary**. **Settings** (the gear): change password, the three privacy promises, Sign out.

6.8 Badges

Badge	Earned when
Seedling	Joined the initiative
Voice heard	Sent the group survey
Committed	Accepted the participant agreement

Badge	Earned when
First dig	Attended a first session
Rooted	Attended 3 sessions
On a roll	3 sessions in a row (excused doesn't break it)
Evergreen	100% attendance over 3 or more sessions
Reflective	Wrote a CAS reflection
Deep roots	Wrote 3 reflections
Team player	Your group recycled 20 kg or more

To build: when a badge is newly earned, a small celebration: the medal flips from grey to gold with one light sweep and a toast.

6.9 The CAS summary (printable)

A certificate on its own page, A4 when printed: a thick forest frame with a thin gold inner line, the seal with GREENROOTS COLLECTIVE and the slogan, "CAS PARTICIPATION SUMMARY", the student's name in Cinzel, class · school · GRC ID, one sentence about the programme, four boxes (sessions, hours, attendance %, reflections), a table of every session (date, time, status, kg), and two signature lines: **Mazen Choumari, Founder & Executive Director** and the date. Buttons "Back" and "Print / Save as PDF" disappear when printed.

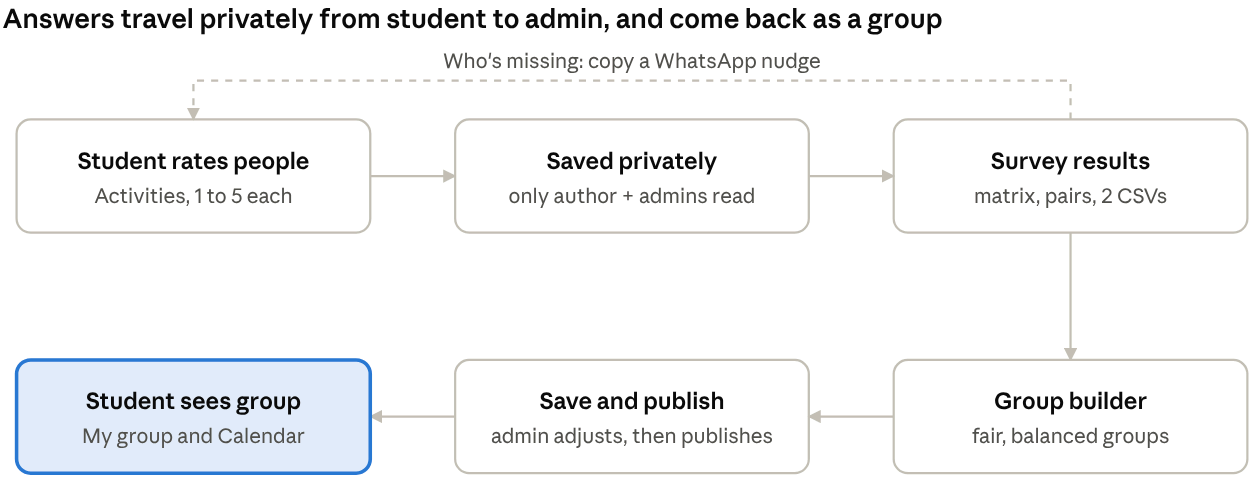

DONE WHEN (student portal).

- [ ] A brand-new student sees the survey and agreement on Home and in Activities with due dates.
- [ ] After a session is marked, the reflection appears automatically and the ring, hours and badges update.
- [ ] Rebuilding groups never hides a student's past sessions.
- [ ] Every page works at 390 px with the side menu in the drawer.

7 · The group survey and its results (the heart of it)

STATUS: fully built and tested. Students answer it in **Activities → Group preference survey**. Admins see every answer in **Survey results** (the chip in the top bar, or Activities → Results) and can **export them as CSV**. The group builder turns them into groups. Nothing here is a mock-up.

THE FEELING. For the student: "I'm being listened to, and nobody will ever know what I said." For the admin: "I can see exactly who wants to be with whom, and the computer does the hard part fairly."

the survey's journey · 6 steps and a reminder loop

Students never see each other's answers at any step; groups reach them only after an admin saves and publishes.

7.1 Where the student finds it

1. On **Home**, in the *To do* card, as soon as they join: "SURVEY · Group preference survey · Due 17 Oct".
2. In **Activities**, at the top of *To do*, with the red count on the menu.
3. The due date is set by admins. After the due date it shows *Overdue* in clay until done. If admins close the survey, it shows *Closed*.

7.2 What the student sees and does

THE SET, top to bottom.

1. A forest **privacy banner** with a shield: "**Private and anonymous to students.** Other participants never see your answers or who rated them. Only the GRC admin team can view responses, and only to build fair groups." This is honest: it says admins can see them.
2. If already sent, a green note: "Sent on 14 October. You can still change your answers."
3. One line: "How much would you like to be in a group with each person? Skip anyone you don't know, which counts as neutral."
4. The **legend**: five chips, each with its coloured number: 1 Rather not (clay) · 2 Not really (peach) · 3 Neutral (stone) · 4 Would like (light green) · 5 Really want (deep green).
5. A **search box** and a live counter, "8 of 16 rated".
6. **One row per participant**: initials, name, class, and five 44 px square buttons 1–5. Tapping one fills it with its colour, pops it to 106% with a small shadow; tapping it again clears it. On phones the five buttons stretch across the full row.
7. **A couple more things (optional):** which weekdays work best (Mon–Fri chips that turn forest when picked) and a private note to the admins (500 characters).
8. A sticky **save bar** that floats at the bottom of the screen with the counter and "Send my answers" (later "Update my answers").

THE FILM. Send → the button turns into a spinner → forest toast "Thanks! Your answers were saved privately." → back to Activities, where the survey now sits in *Completed*, the "Voice heard" badge lights up, and the Activities count drops by one.

Rules. Students rate only other active student members (never admins, never themselves). They can change answers any time while the survey is open. Saving replaces their old answers completely.

7.3 Where the admin sees the results

Survey results page (marked *Admin · Confidential*):

Part	What it shows
Header	"14 of 17 answered · 129 ratings" and three buttons: **Export ratings (CSV)**, **Export per-person summary**, Reset all answers
Admin-eyes-only banner	A reminder not to screenshot or share

Part	What it shows
Strong mutual pairs	Every pair who rated each other 4 or 5, strongest first, with a score out of 10
Keep apart	Every pair where at least one said 1 ("rather not")
Rating matrix	A grid: rows = who rated, columns = who was rated, each cell coloured 1–5 with the number; hovering a cell says "Ana → Bruno: 5 · Really want"; rows of people who haven't answered are marked
Availability & notes	Each person's best days and private note, with the date they sent it

And in **Activities**, the survey row shows a progress bar ("14/17 done, 82%") with **Who's missing**: a list of everyone who hasn't answered and a button that copies a ready WhatsApp reminder with the link and their names.

7.4 The two CSV exports

Export ratings gives one row per rating:

```
Rater GRC ID,Rater,Rater class,Rated GRC ID,Rated person,Score (1-5),Meaning
ANA-89,Ana Carballo Carmona,1 ESO A,BRU-21,Bruno Arias Míguez,5,Really want
```

Export per-person summary gives one row per student: GRC ID, name, class, current group, answered (yes/no), sent on, how many people they rated, who they want to be with (4–5), who they'd rather not (1), mutual picks, best days, private note. Both open straight in Excel or Google Sheets and can sit next to the Mainframe.

7.5 How the answers become groups

In **Group builder**, the admin picks the number of groups (it suggests one: for 15 members, **4 groups of 4 · 4 · 4 · 3**) and presses **Build best groups**. The formula:

```
\text{pair score}(A,B) = (r_{A\to B} - 3) + (r_{B\to A} - 3)
```

Unrated counts as 3, so a mutual 5 adds +4 and a single 1 subtracts 2. The total adds every pair inside every group, plus a bonus for the *least happy person* (the lowest average rating anyone gives their own group mates), so nobody is left alone. Group sizes always differ by

at most one. It tries many random starting points and improves each by swapping people, then keeps the best. Under a second for 60 people.

The result shows four numbers (% who got at least one person they wanted, average rating of group mates, the least-happy score, "rather not" clashes) and a coloured dot beside every name: green (has someone they wanted), amber (neutral), clay (a clash). Admins can move anyone by hand, then **Save groups** and switch on **Publish**. Only then do students see their group.

7.6 Privacy, enforced

- The database only ever returns a student **their own** ratings. Even a student who opens the browser's developer tools cannot read anyone else's.
- Admins read all ratings; the page tells students this.
- The directory students rate from contains name, class and (once published) group only. No emails, no phones.
- "Reset all answers" (new term) asks for confirmation and is admin-only.

DO NOT. Show any rating, count or "popularity" to students. Put the survey in the menu as its own tab. Publish groups before saving them.

DONE WHEN.

- [ ] A student can rate, add days and a note, send, come back and change answers.
- [ ] The admin sees the new answers immediately in the matrix, the pairs and both CSV exports.
- [ ] "Who's missing" lists exactly the students without an answer.
- [ ] The builder respects every "rather not" where possible and reports any clash it could not avoid.
- [ ] Tested with two real student accounts: neither can see the other's answers.

8 · The admin control room, page by page

STATUS: all pages built in v2 and tested. Admins get in by typing the **admin code** on the code screen, or by being promoted in Members.

THE FEELING. Mission control in a greenhouse. Calm, dense with information but never cluttered, and always one click from the next action.

8.1 Overview

The header gives today's date and the state of things ("groups published · survey open"). Four KPI cards, each with an icon tile in the corner: **Members** (and accounts waiting for a code) · **Survey answered** (14/17 with a progress bar) · **Attendance rate** (with attendances and hours) · **Recycled** (kg, bags, sessions).

Then four cards:

Card	What it shows
Needs your attention	Clickable alert rows: absence requests to review, past sessions without attendance, people who haven't done the survey, overdue activities with how many are missing, accounts without a code. "All caught up!" with a green tick when empty
Next sessions	The next four: date tile, group, weekday, time, "tomorrow / in 8 days", group size
Attendance per session	Vertical forest bars for the last eight sessions, labelled by group and date
Group league	Ranked groups with kg, bags and attendance %, plus the suggested split for the current number of members

8.2 Members

A searchable table with filters by status and by school: GRC ID (auto, Mainframe format: first 3 letters of the first name + last 2 phone digits, or first 2 letters of the surname), name and email, class, WhatsApp, survey done, attendance %, group (dropdown), status (pending / member / inactive), role (student / admin), delete. Every change saves instantly with a toast. Header buttons: **Copy WhatsApp list** and **Export for Mainframe**, a CSV with the exact column order of the Participants Mainframe sheet (GRC Participant ID, Full Name, Group, Date of Birth, Class, Email, Country Code, Raw Phone, WhatsApp Phone, School).

8.3 Activities

Every activity as a row: type icon, "SURVEY · DUE 17 OCT", title, a completion bar and "14/17 done (82%)", **Who's missing**, Results (for the survey), and a pencil to edit. **New activity** opens a modal: type (agreement, link/form, group survey), title, description, link, due date, visible to students. A switch opens or closes the survey. Below: **CAS reflections**, every reflection as a card with the student, group, date, learning outcome chip, what they did and what they learned.

8.4 Survey results and Group builder

Described in section 7.

8.5 Sessions & impact

Two fold-out cards: **Generate a rotation** (first date, number of weeks, start and end time, meeting point, lead admin → one session per week cycling Group 1 → 2 → 3 → 4) and **Add a single session**. Then *Upcoming / Past / All* tabs and a list of session rows (date tile, group and weekday, time, place, lead, pills for absence requests, kg and bags, "3/4 present", and **Manage**).

Manage opens a sand panel with two parts. **Impact:** status (scheduled, done, cancelled), kg recycled, bags, photos link, Save, delete. **Attendance:** one row per group member with four pill buttons (Present, Late, Excused, Absent) that fill with their colour, "Mark all present", and a small *Request pending* pill beside anyone who asked to be excused. **Export CSV** gives every session with its numbers.

8.6 Attendance tracker

At the top, when there are any, a card of **absence requests**: who, group, date, reason, a clay "less than 24 h notice" note when late, **Approve** (marks them excused) and **Decline**. Then a summary: an overall ring and tiles for present, late, excused, absent, person-hours. Then the **grid**: one row per member (name, group, their rate in a green, amber or clay cell), one column per past session (date and group). Each cell is a 34 px square: ✓ green, L olive, E amber, × clay, dashed when not marked, a dot when it wasn't their group. **Clicking a cell cycles** not marked → present → late → excused → absent. A group filter and **Export CSV** (rate, counts, hours, every session).

8.7 Announcements, Schools, Settings

- **Announcements:** title, message, signature, "Pin to top" switch, Post. Each posted card has a pin toggle and delete.
- **Schools:** cards with a school icon, name, city, student domain, staff domain, active or hidden, number of students, Edit. **Add school** opens a modal. Agora Madrid International School is there from the start.
- **Settings** (gear): the **join code** and the **admin code** (must differ), the survey switch, the groups-visible switch, the connection mode, and change password.

8.8 The weekly admin routine

1. Monday: open Overview and clear "Needs your attention".
2. Before a session: check Next sessions; post an announcement if anything changed.
3. After a session: Sessions & impact → Manage → mark attendance ("Mark all present" then fix exceptions), enter kg and bags, paste the photos album link, set to *done*.
4. Approve or decline absence requests as they arrive.
5. Monthly: export Members and Attendance to the Mainframe.

DONE WHEN.

- [ ] Every number on Overview matches the detail pages.
- [ ] A new admin can run a full session (mark, log, close) in under two minutes.
- [ ] All exports open correctly in Excel and Google Sheets, accents included.

9 · Data, privacy and security

Every rule below is enforced by the database (Supabase Row Level Security), not just hidden in the page. It was tested on a real Postgres database with student and admin accounts, including a student trying to promote themselves.

9.1 What is stored

Data	Who can read it	Who can change it
Name, class, school	The student, admins. Other students see name + class + group only	The student (name, class); admins (all)

Data	Who can read it	Who can change it
School email	The student, admins	Nobody (fixed at sign-up)
WhatsApp code + number	The student, admins	The student
Role, status, group, GRC ID	The student (read), admins	Admins only. A student's attempt is silently undone
Survey ratings, days, note	The author, admins	The author, while the survey is open
Attendance	The student (own), admins	Admins only
Absence requests	The student (own), admins	Student creates for their own group's sessions; admins approve or decline
Reflections	The author, admins	The author, only for sessions they attended
Sessions	Admins; students see their group's sessions once published, plus any session they attended	Admins
Join code, admin code	Admins only	Admins
Public numbers (kg, bags, sessions, members, schools)	Everyone, through one summary that contains no names	Calculated

9.2 Rules

- Sign-up requires choosing an active school and using its student or staff email domain.
- Passwords are handled by Supabase (hashed); the portal never sees them.
- Minimum data: no date of birth, guardian or tutor in the portal. Those stay in the Mainframe.
- Consent is asked at sign-up in plain words.
- Spanish data protection law (LOPD) is named in the footer; students can ask to be removed by email.
- **Before going live:** confirm with Alberto / the school that collecting names, school emails and WhatsApp numbers is fine. Most participants are minors.

10 · Tech, files and going live

The code is finished; going live is setup, not building. No Claude Design step is needed. Take the project zip to Claude Code, connect a new GitHub repository, connect Supabase, and deploy.

10.1 Stack

- **Website:** plain HTML, CSS and JavaScript modules. No build step, so anyone on the team can edit it.
- **Database and logins:** Supabase (free tier), EU region.
- **Hosting:** Vercel or Netlify (work with a private repo, free), or GitHub Pages (needs a public repo on the free plan).
- **Fonts:** Google Fonts (Cinzel, Bricolage Grotesque, Montserrat).
- **Demo mode:** with no Supabase keys the site runs on fictional data saved in the browser, so it can be shown before launch.

10.2 Files

File	What it holds
index.html	The page shell and fonts
assets/css/styles.css	All styling; brand colours are tokens at the top
assets/js/config.js	Supabase URL and key, programme name, year, class list, contact email
assets/js/app.js	The router and the portal frame (side menu, top bar)
assets/js/core.js	Shared helpers, icons, badges, attendance maths, calendar export
assets/js/public.js	The landing mini-site and the sign-in pages
assets/js/student.js	Every student page, the survey and the CAS summary
assets/js/admin.js	Every admin page, including survey results and exports

File	What it holds
assets/js/grouping.js	The group-building formula
assets/js/backend-supabase.js / backend-demo.js	Live database / demo data
supabase/schema.sql	All tables and security rules, run once
docs/PLAN.md, docs/SETUP.md	Plan and step-by-step setup

10.3 Going live with Claude Code, step by step

1. Create an empty repository, e.g. `Greenroots-Collective/grc-recycling-portal` (private is fine).
2. Open Claude Code, attach the zip, and say: *"Push this project to that repository, then follow docs/SETUP.md with me."*
3. Create a Supabase project (EU), open the SQL Editor, paste `supabase/schema.sql`, Run.
4. Copy the Project URL and anon key into `assets/js/config.js`.
5. Change the join and admin codes from the defaults.
6. Deploy on Vercel (import repo, framework "Other", no build settings). Put the live URL into Supabase → Authentication → URL Configuration.
7. Sign up yourself, type the admin code, check every admin page. Sign up a test student in another browser and confirm they see nothing private.
8. Later: point `recycling.greenroots.tech` at it and add a "Participant Portal" button on greenroots.tech.

10.4 Briefing for Claude Code

Paste this when you start:

> Read docs/PLAN.md, docs/SETUP.md and this Director's Plan before changing anything. Everything marked "built" works and is tested: do not rewrite it. Your jobs, in order: (1) push to GitHub; (2) connect Supabase and test every security rule in section 9 with two student accounts and one admin; (3) deploy; (4) build the items marked *to build*: hero letter-by-letter mask reveal, light sweep on the seal, leaf drift on hero and CTA, badge-earned celebration, banner breathing; (5) check every DONE WHEN box at 1440, 1366, 768 and 390 px and report yes/no per box. Keep the palette, fonts and motion values exactly as written.

DONE WHEN.

- [ ] The repo is on GitHub and the site is live on a URL.
- [ ] The demo banner is gone (live database connected).
- [ ] The default codes are changed.
- [ ] Two real student accounts and one admin pass every privacy test.

11 · Roadmap and decisions for the director

Launch first, polish second, grow third. The first two can happen this week; the third is the rest of the year.

11.1 Decisions only you can make

- [ ] The names and email domains of the partner schools (Admin → Schools).
- [ ] Survey due date (the demo uses one week after joining).
- [ ] Who gets the admin code: Mazen, Hugo, Alberto?
- [ ] Session time and meeting point for the rotation (the demo uses Tuesday 10:50–11:40, pick up at class).
- [ ] School approval for the data collected.
- [ ] Whether team photos replace the initials on the landing page.

11.2 Roadmap

Phase	What	Who
Launch (this week)	GitHub, Supabase, deploy, codes, first admins, send link + code to the 15 students	Claude Code + Mazen

Phase	What	Who
Week 1	Students join, survey + agreement; nudges via "Who's missing"	Admins
Week 2	Build, save and publish groups; generate the rotation; first session	Admins
Polish	The *to build* motion items; real team photos; a custom domain	Claude Code
Later	Photo uploads in the portal; automatic reminders the day before; a Spanish version; the full Mainframe profile (DOB, tutor, guardian); the Garden Club as a second programme	GRC Tech

11.3 The numbers today

15 students on the email, Hugo and Alberto in Cc. Recommended split: **4 groups of 4 · 4 · 4 · 3**, one group a week, so each student goes about once a month. One more student makes it 4 × 4.
